GPS Vehicle Tracking

Live visibility. Smarter control.
Better fleet decisions.

- Live Tracking
- Alerts
- Route History
- Geofencing

THE PROBLEM

Vehicle owners need better visibility and control

236,795

motor-vehicle theft cases

Reported in India in 2021 | Ministry of Home Affairs annual report

High theft risk

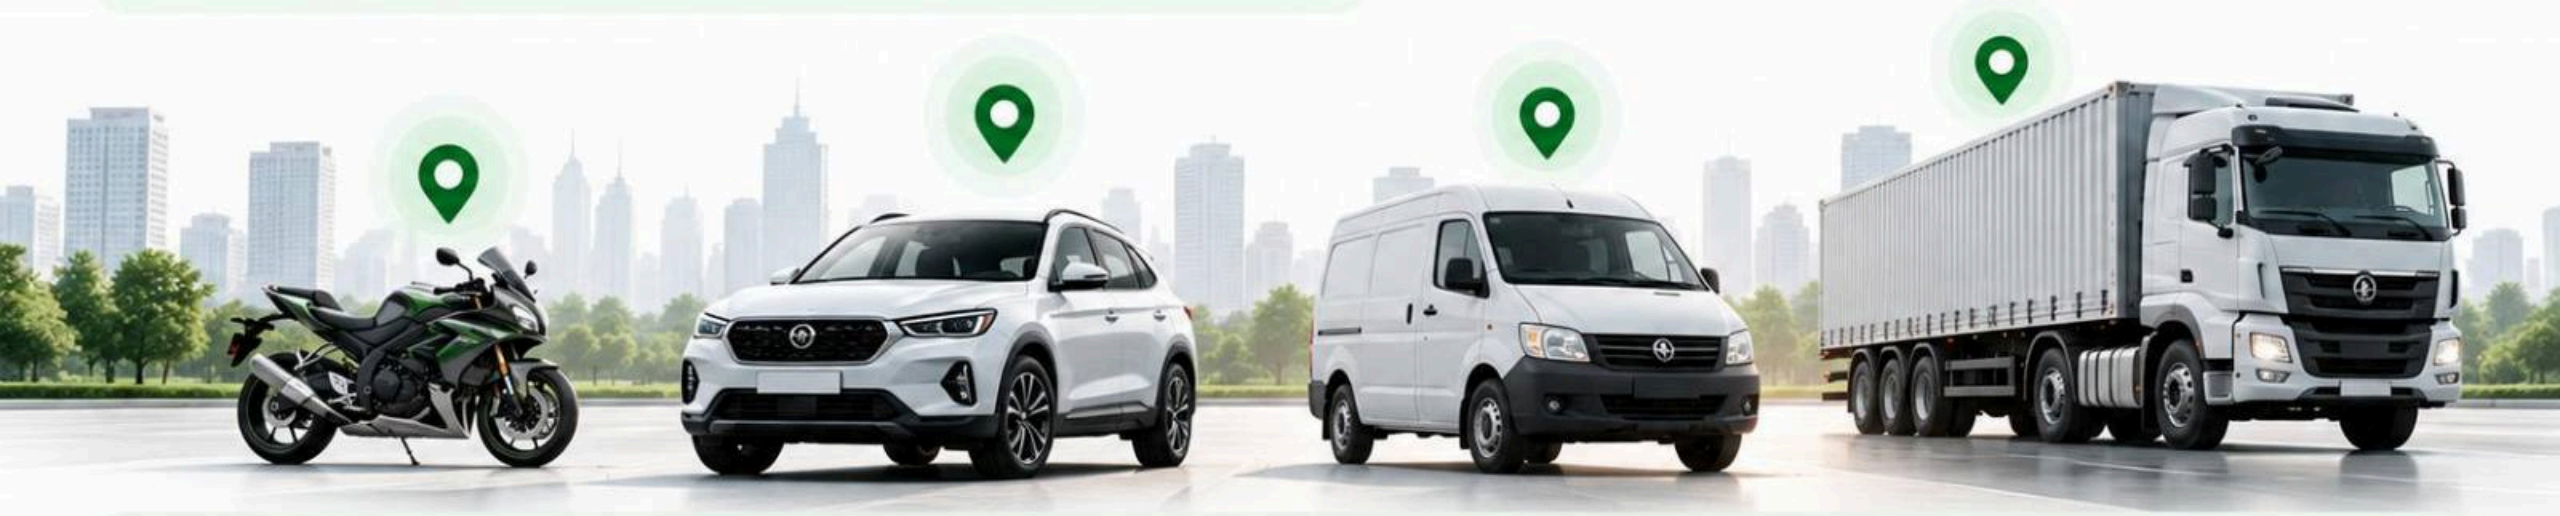

Vehicles can be stolen within minutes.

Limited visibility

Hard to know where your vehicle is in real time.

Delayed recovery

Finding and recovering stolen vehicles takes time.

Without live tracking, owners and fleet operators have limited visibility after a vehicle moves or goes missing.

One Tracker.
Complete Visibility.

Track, review and manage your vehicles from one app.

Live location
See real-time location of your vehicle on map.

Movement & idle alerts
Get instant alerts for start/stop, idle, overspeed and more.

Route history & trip insights
View past trips, routes, distance, time and vehicle usage.

Custom geofencing
Create safe zones and get real-time enter/exit alerts.

Remote engine control
Lock or unlock engine directly from the app.

Works with a wide range of vehicles

2 Wheeler

4 Wheeler

3 Wheeler

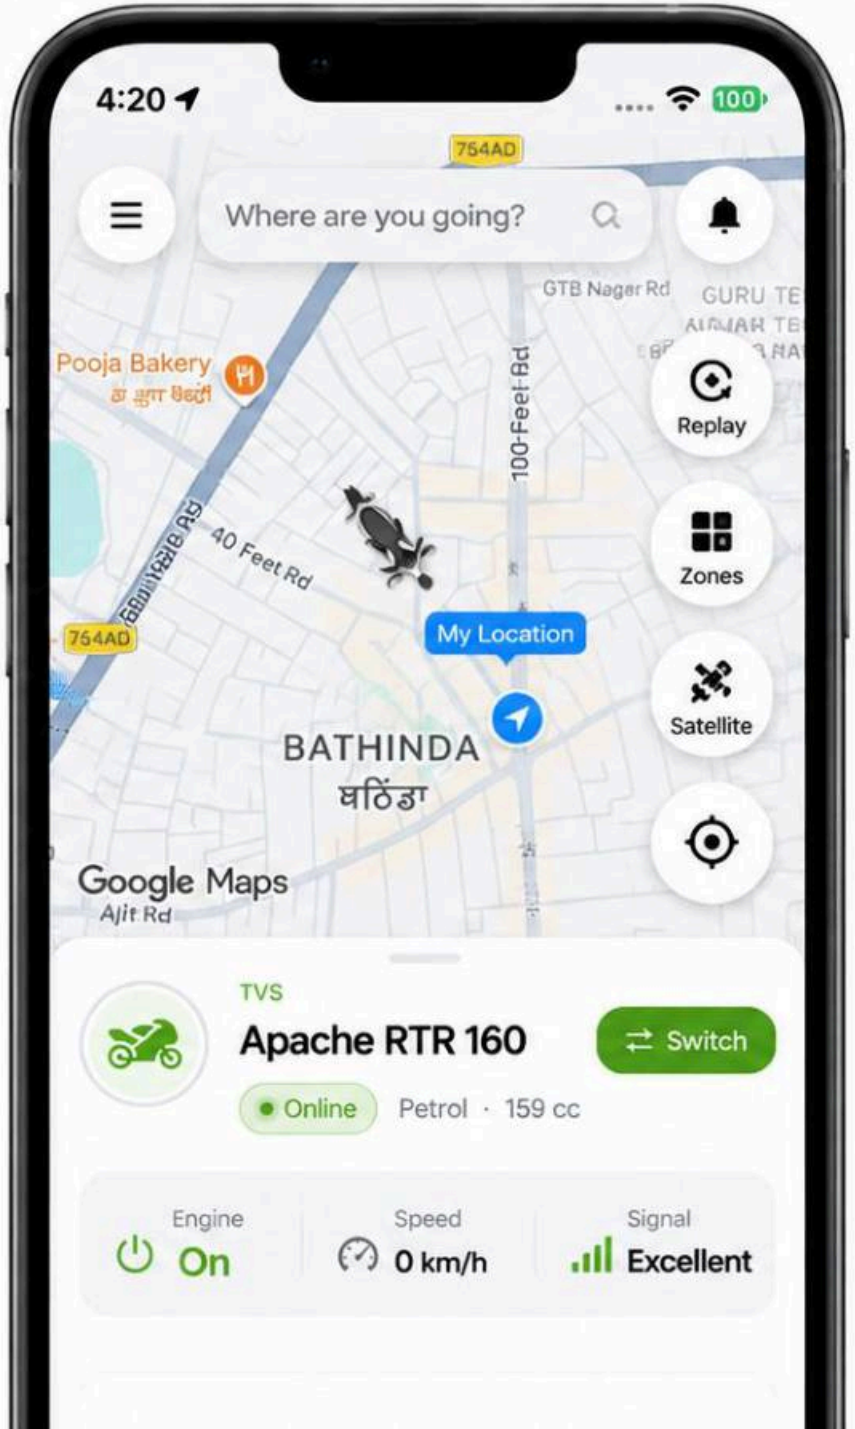

Van / LCV

Truck

Compact Hardware. Connected Vehicles.

- GPS location reporting
- Cellular data connectivity
- Vehicle power integration
- Remote command support
- Designed for 2-wheelers, 3-wheelers, cars and trucks

Live Vehicle Tracking

Real-time location, complete visibility

Live vehicle location

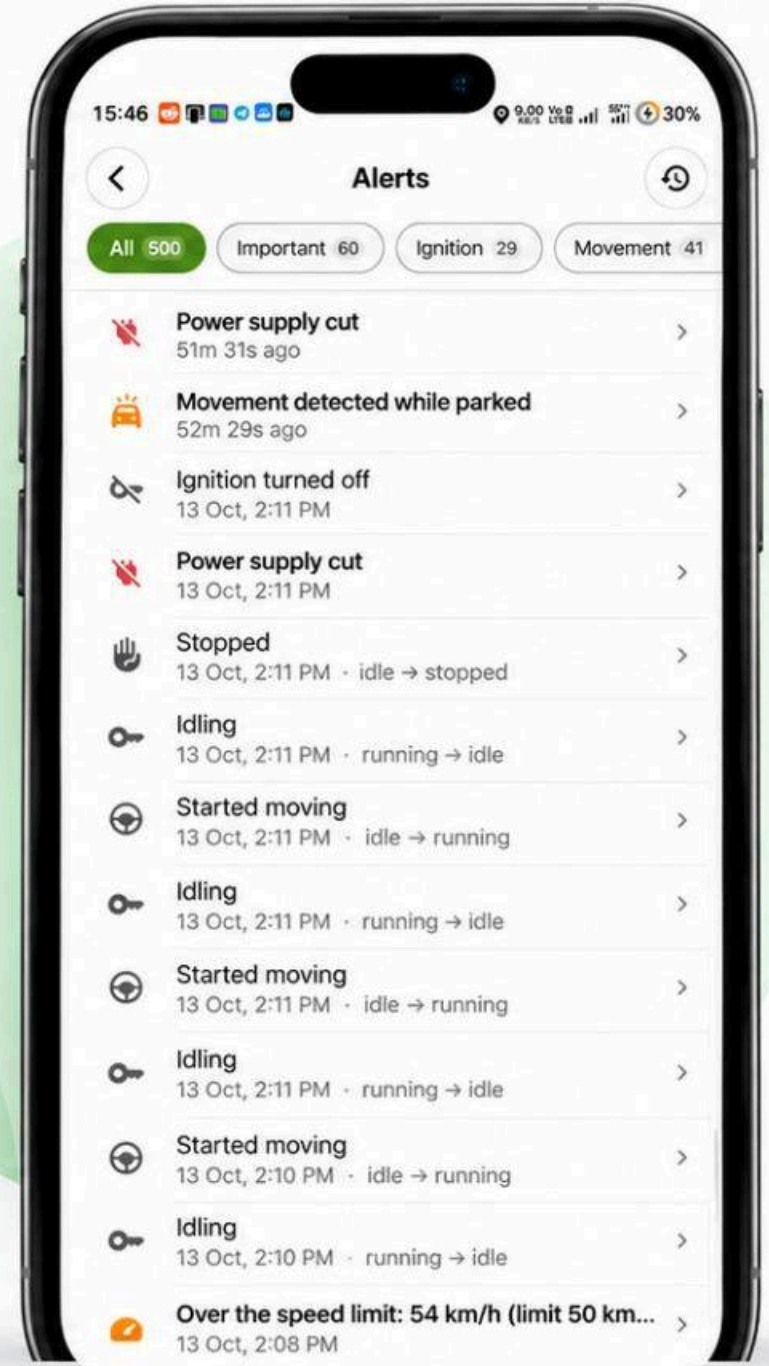

Get real-time location on map with accurate updates.

Vehicle and user location markers

View both vehicle location and your current location on the same map.

Engine, speed and signal status

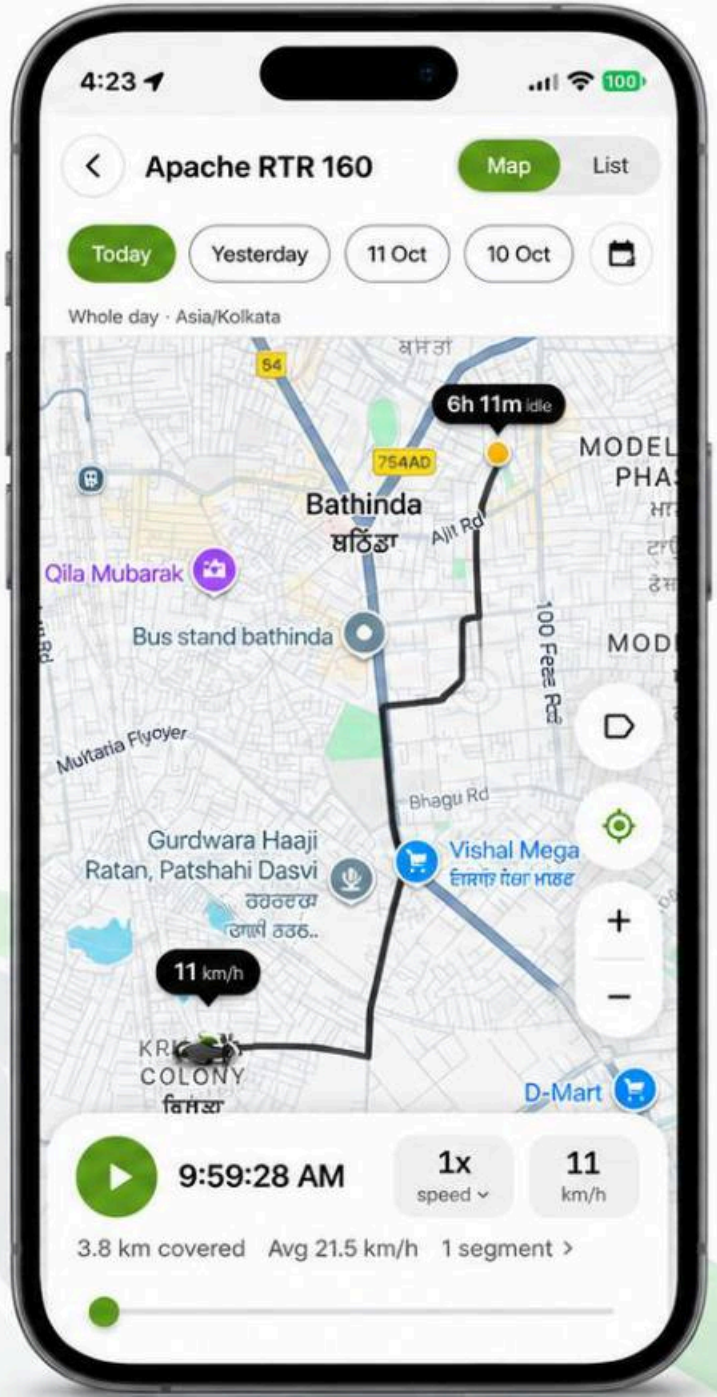

Check engine status, current speed and GPS signal strength in real time.

Smart Vehicle Alerts

Know what happens, as it happens.

- Movement and idle events
- Time-stamped activity history
- Quick review of vehicle status

FEATURE – ROUTE HISTORY

Route History & Playback

Understand every trip, from start to finish.

Replay recorded journeys

Play back your vehicle routes on the map with time controls to see the complete journey.

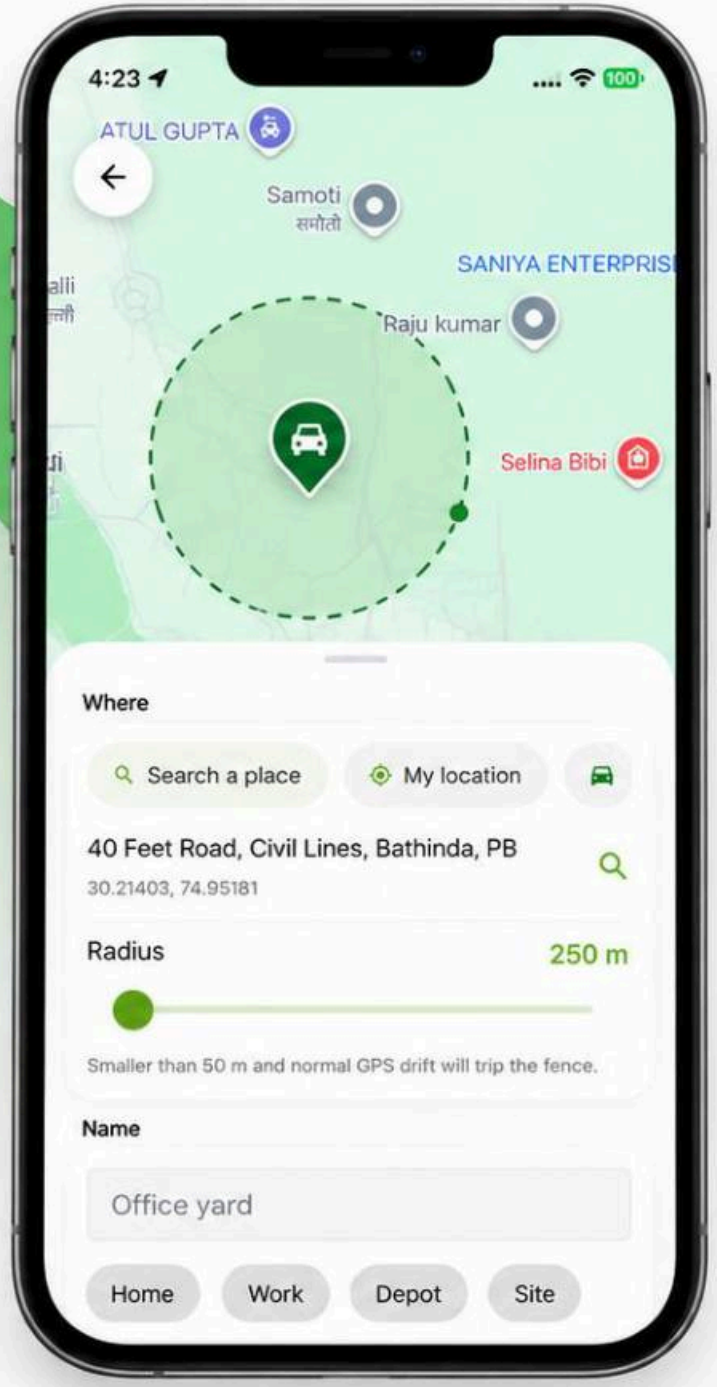

Review distance, speed and idle time

Get detailed trip information including total distance, average speed, running time and idle time.

Compare trip activity by date

View trips for any day, track multiple journeys and analyse vehicle usage patterns.

Playback availability depends on retained trip data (up to 6 months).

Custom Geofencing

Set boundaries that fit your operation.

Create flexible zones

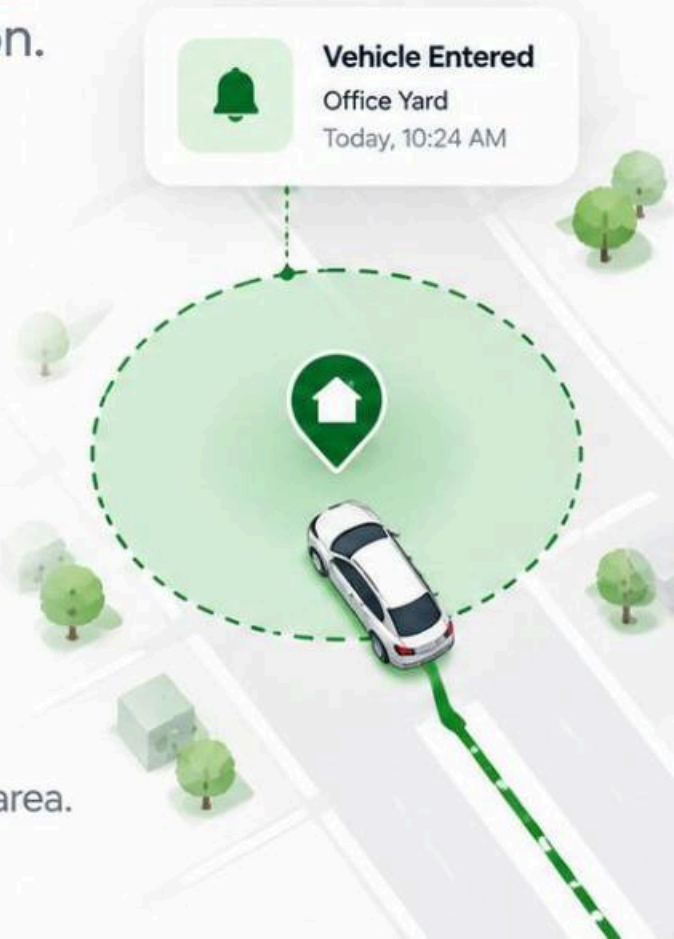

Set circular or polygonal geofences for any location.

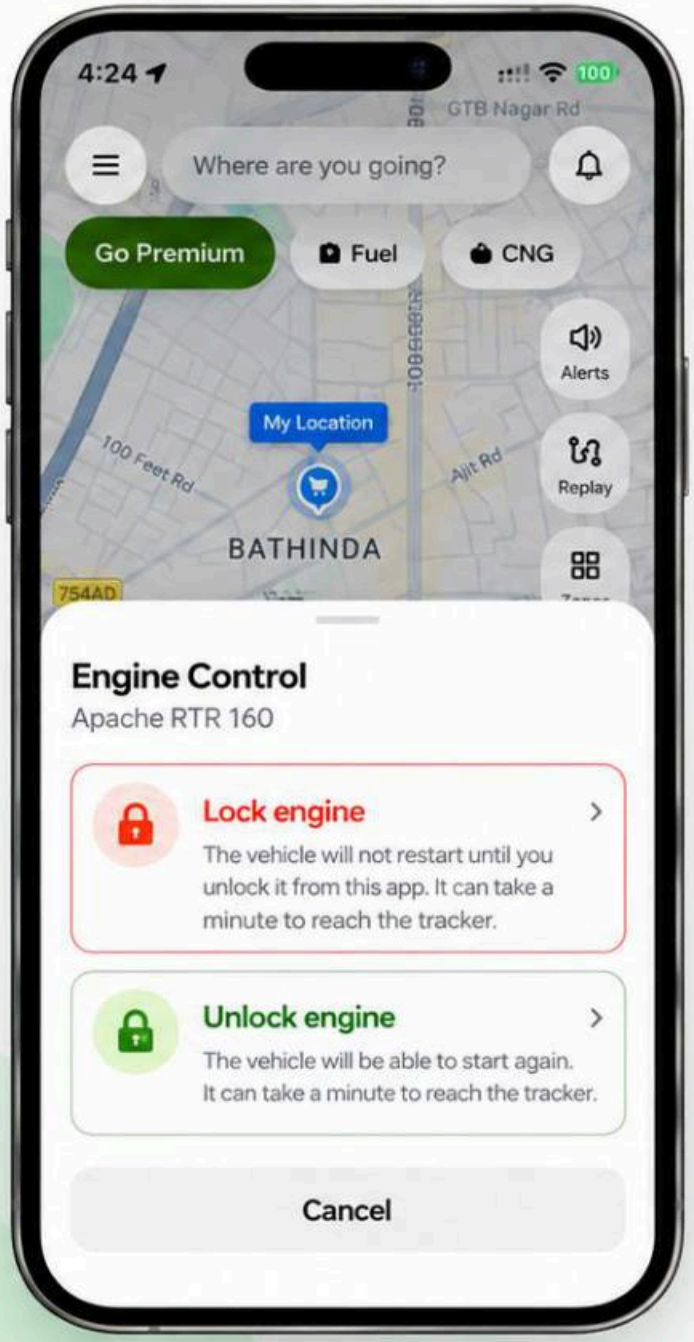

Choose places or radius

Search a location or set a custom radius from your current location.

Receive enter/exit alerts

Get instant notifications when your vehicle enters or leaves a geofenced area.

Remote Engine Control

Manage vehicle access from the app.

Send lock / unlock command

Remotely lock or unlock the vehicle engine with a single tap from the app.

Clear confirmation and current state

Get real-time status and confirmation once the command is executed.

Designed for authorised use

Only authorised users can control the engine, ensuring better security for your vehicle.

Use only when the vehicle is safely parked and where legally permitted.

Built for Everyday Control

Know where vehicles are	›	Live location updates
Act on vehicle activity	›	Movement and idle alerts
Review every journey	›	Route history and trip stats
Set virtual boundaries	›	Geofence entry and exit alerts
Manage vehicle access	›	Remote engine lock and unlock
Support mixed fleets	›	2-wheelers, 3-wheelers, cars, vans and trucks
